2. Operating current : <10m
3. Listening range : ≤5m
4. Operating current : <30mA
5. Operating temperature: -20°C to +70°C

LG 301 Asset Tracker

The LG 301 asset tracker generates detailed reports that show where a vehicle has been, where it is going, and how quickly it is moving. It features a 6000mAh battery for maximum performance, IPX4 water resistance for maximum protection, and can manage individual vehicles or fleets as well. This device can be used for about 10 days without a backup battery.
